You are exclusively invited to the CUTERA Training Suite in Melbourne to experience our award winning medical aesthetics technology.

At CUTERA, we continually strive to innovate and stay at the forefront of aesthetics and body contouring. We are pleased to be able to welcome you to our new clinical training suite so you can interact with the latest generation of devices and, if you choose, have a treatment.

truSculpt iD

Personalised, hands-free and hand-held body sculpting using non-invasive Monopolar RF. Average 24% fat reduction with pain-free, 15-minute treatments.

truSculpt flex

Multi-Directional Stimulation (MDS) deploys a unique precision EMS to target specific muscle groups. Personalise treatments with prep, tone and sculpt modes.

Excel V+

Features two clinically proven wavelengths (532/1064 nm), large spot sizes up to 16mm, higher energy and a smart cooling system for unrivalled precision, speed and comfort.

Excel HR

Hair removal using high-power 755 nm Alexandrite laser and proven long-pulse 1064 nm Nd:YAG laser, plus treatment of lesions and CUTERA's laser genesis skin revitalisation.

XEO

Completely customisable laser and light-based system to treat a wide range of aesthetic concerns, from veins, pigment, wrinkles and hair removal, to skin revitalisation.

We look forward to welcoming you to the CUTERA Clinical Suite on 22 November and demonstrating how CUTERA's cutting edge devices can transform your practice.
