## NON-ABLATIVE SKIN REVITALISATION

A customisable, multi-application light-based platform designed to treat the widest range of today's most common non-ablative skin concerns.

PIGMENT

VASCULAR

SKIN QUALITY

HAIR REMOVAL

xeo SA's comprehensive offering of intense pulsed light options provides a complete range of treatments associated with the signs of photo-aging and other skin imperfections.

### LIMELIGHT

Customisable approach for 3-in-1 pigment & vascular treatments

- + **Programmable wavelengths from 520 - 1100 nm:** 3 distinct pre-set programs provide excellent hemoglobin and melanin absorption for superior outcomes, uniform treatments, and ease of use.
- + **Fast treatments:** 10 mm x 30 mm tip provides fast & effective treatments up to 2 Hz.
- + **Real time automatic calibration:** Seamless monitoring and adjustments ensure accurate output, pulse after pulse.
- + **Sun mode:** Reduces cooling to the skin, allowing a more aggressive treatment of superficial lentiginos while maintaining a high safety margin.

Photo-rejuvenation market is expected reach \$2.5B by 2025<sup>1</sup>

Aging skin and increased skin disorders are driving demand for photorejuvenation<sup>1</sup>

Hair removal is in the top 5 non-surgical procedures<sup>2</sup>

## ACUTIP

Targeted and precise energy delivery to discrete lesions

- + **Optimised wavelength spectrum:** Ranging from 500 – 635 nm, AcuTip's wavelength range is specifically optimized for hemoglobin and melanin.
- + **Increased visibility:** AcuTip's small contact tip (6.35 mm) offers exceptional visibility and unobstructed views of the treatment area to trace discrete lesions rapidly and effectively.
- + **Ergonomic handpiece:** Designed to minimize user fatigue, the AcuTip handpiece is light, ergonomic, and easy to use.

## PROWAVE LX

Power of an Alexandrite Laser, Delivered with the Ease of an IPL

- + **Predictable outcomes:** ProWave LX provides the clinical efficacy on finer, lighter hair by harnessing high peak powers, short pulse widths and consistent energy monitoring throughout the treatment.
- + **Enhanced patient comfort:** Aggressive, adjustable contact cooling from 5 - 20 °C for superior comfort, safety, and efficacy on skin types I - IV.
- + **Unique handpiece design:** Low profile design enhances operator visibility during the treatment, while maintaining fast treatments with the 10 x 30 mm tip.
- + **Intuitive user interface:** Designed with 3 preset options, ProWave LX features an intuitive user interface, ideal for delegating and providing best-in-class hair removal on all skin types.
